

# Breadboard Base for Pibow

PIM086

Want to carry your Pi and project around together? Say hello to the Pibow Breadboard base!

Works with almost all Pibows in existence, replaces the bottom and gives you space for a 400-point breadboard, or two 170-point mini breadboards. So handy!

(Raspberry Pi, Pibow, jumper jerky, 400-point and 170-point breadboard sold separately)
