

Rail-to-rail 1.1 V dual and quad nanopower comparators

Datasheet - production data

- Quad version available in SO14, TSSOP14 and QFN16 3 x 3 mm package

Related product

- See the TS881 datasheet for single operator with smaller package.

Applications

- Portable systems
- Signal conditioning
- Medical

Description

The TS882 is a dual and the TS884 device a quad comparator featuring ultra-low supply current (220 nA typical per operator with output high, $V_{CC} = 1.2$ V, no load) with rail-to-rail input and output capability. The performance of these comparators allows them to be used in a wide range of portable applications. The TS882 and TS884 devices minimize battery supply leakage and therefore enhance battery lifetime.

Operating from 1.1 to 5.5 V supply voltage, these comparators can be used over a wide temperature range (-40 to +125 °C) keeping the current consumption at an ultra-low level.

Features

- Ultra-low current consumption: 220 nA typ./op.
- Propagation delay: 2 μ s typ.
- Rail-to-rail inputs
- Push-pull outputs
- Supply operation from 1.1 V to 5.5 V
- Wide temperature range: -40 to +125 °C
- ESD tolerance: 8 kV HBM / 300 V MM
- Dual version available in MiniSO8 and DFN8 (2 x 2 mm) package

Table 1. Device summary

Order codes	Temperature range	Packages	Packaging	Marking

	Latch-up immunity	200	mA

1. All voltage values, except differential voltages, are referenced to V_{CC-} . V_{CC} is defined as the difference between V_{CC+} and V_{CC-} .
2. The magnitude of input and output voltages must never exceed the supply rail ±0.3 V.
3. Short-circuits can cause excessive heating. These values are typical.
4. According to JEDEC standard JESD22-A114F.
5. According to JEDEC standard JESD22-A115A.
6. According to ANSI/ESD STM5.3.1.

Table 3. Operating conditions

T_{ON}	Power-up time			1.1	1.7	ms

1. All values over the temperature range are guaranteed through correlation and simulation. No production test is performed at the temperature range limits.
2. The offset is defined as the average value of positive and negative trip points (input voltage differences requested to change the output state in each direction).
3. The hysteresis is a built-in feature of the TS882 device. It is defined as the voltage difference between the trip points.
4. Maximum values include unavoidable inaccuracies of the industrial tests.

5 Revision history

Table 12. Document revision history

Date	Revision	Changes
18-Jan-2013	1	Initial release.
02-May-2013	2	<p>Added TS884 device to header, <i>Description</i>, and <i>Table 1: Device summary</i>.</p> <p>Updated title (added “quad” comparator).</p> <p>Updated <i>Features</i> and <i>Table 2</i> (ESD tolerance: “6 kV” HBM replaced by “8 kV” HBM).</p> <p>Updated <i>Description</i> in accordance with added TS884 device.</p> <p>Added SO14, TSSOP14 and QFN16 3 x 3 mm package to <i>Features</i>, figure on page 1, <i>Section 4: Package information</i>. and <i>Table 1: Device summary</i>.</p> <p>Moved <i>Figure 1: Pin connections TS882 (top view)</i> to page 3.</p> <p>Added <i>Figure 2: Pin connections TS884 (top view)</i>.</p> <p>Updated <i>Table 2: Absolute maximum ratings</i> (added TS884 device R_{THJA} values).</p> <p>Minor corrections throughout document.</p>
14-Jul-2014	3	Updated <i>Table 1: Device summary on page 1</i>

Please Read Carefully:

Information in this document is provided solely in connection with ST products. STMicroelectronics NV and its subsidiaries ("ST") reserve the right to make changes, corrections, modifications or improvements, to this document, and the products and services described herein at any time, without notice.

All ST products are sold pursuant to ST's terms and conditions of sale.

Purchasers are solely responsible for the choice, selection and use of the ST products and services described herein, and ST assumes no liability whatsoever relating to the choice, selection or use of the ST products and services described herein.

No license, express or implied, by estoppel or otherwise, to any intellectual property rights is granted under this document. If any part of this document refers to any third party products or services it shall not be deemed a license grant by ST for the use of such third party products or services, or any intellectual property contained therein or considered as a warranty covering the use in any manner whatsoever of such third party products or services or any intellectual property contained therein.

UNLESS OTHERWISE SET FORTH IN ST'S TERMS AND CONDITIONS OF SALE ST DISCLAIMS ANY EXPRESS OR IMPLIED WARRANTY WITH RESPECT TO THE USE AND/OR SALE OF ST PRODUCTS INCLUDING WITHOUT LIMITATION IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE (AND THEIR EQUIVALENTS UNDER THE LAWS OF ANY JURISDICTION), OR INFRINGEMENT OF ANY PATENT, COPYRIGHT OR OTHER INTELLECTUAL PROPERTY RIGHT.

ST PRODUCTS ARE NOT DESIGNED OR AUTHORIZED FOR USE IN: (A) SAFETY CRITICAL APPLICATIONS SUCH AS LIFE SUPPORTING, ACTIVE IMPLANTED DEVICES OR SYSTEMS WITH PRODUCT FUNCTIONAL SAFETY REQUIREMENTS; (B) AERONAUTIC APPLICATIONS; (C) AUTOMOTIVE APPLICATIONS OR ENVIRONMENTS, AND/OR (D) AEROSPACE APPLICATIONS OR ENVIRONMENTS. WHERE ST PRODUCTS ARE NOT DESIGNED FOR SUCH USE, THE PURCHASER SHALL USE PRODUCTS AT PURCHASER'S SOLE RISK, EVEN IF ST HAS BEEN INFORMED IN WRITING OF SUCH USAGE, UNLESS A PRODUCT IS EXPRESSLY DESIGNATED BY ST AS BEING INTENDED FOR "AUTOMOTIVE, AUTOMOTIVE SAFETY OR MEDICAL" INDUSTRY DOMAINS ACCORDING TO ST PRODUCT DESIGN SPECIFICATIONS. PRODUCTS FORMALLY ESCC, QML OR JAN QUALIFIED ARE DEEMED SUITABLE FOR USE IN AEROSPACE BY THE CORRESPONDING GOVERNMENTAL AGENCY.

Resale of ST products with provisions different from the statements and/or technical features set forth in this document shall immediately void any warranty granted by ST for the ST product or service described herein and shall not create or extend in any manner whatsoever, any liability of ST.
