

Pi Supply

NESPi Case+ with Cooling Fan, Heatsinks and Flannel Bag

This NESPi Raspberry Pi Case+ is an inspired enclosure for your Raspberry Pi system. It can turn your bare Raspberry Pi 2B/3B/3B+ into an elaborate console. It has the most iconic elements of the retro game world and even features a small hinged door with two USB ports and one standard RJ-45 connector behind.

Description

This NESPi+ case has the most iconic elements of the retro game world as a homage to the most classic console ever made. It has a small hinged door with two USB ports and one standard RJ-45 connector behind.

With improved HDMI and Audio ports, it enhances the experience of using your HDMI and audio output cables. You can insert your Micro SD card on the side to allow more space for you to operate more freely. Your Raspberry Pi PCB will fit perfectly so that you can use it like a NES console as how you remember it.
