

Webcam - USB

SEN-11957

★★★★☆ 2

© images are CC BY-NC-SA 3.0

Description: This is a simple USB Webcam that can be plugged into your computer or dev board and start capturing video right away. The resolution is 1024x768 which is adequate for motion-tracking or object-detection, but don't expect to use it for photography or movie-making.

Note: This webcam works well in Linux, so it pairs well with a pcDuino.

Features:

- Max Resolution: 1024 x 768
- 3' (914.4mm) Retractable USB-A Cable
