

300-133 – Throttle Quadrant Button Assignments

X Axis through Z Rotation = Six Levers, typically used for Throttle, Mixture, or Propeller.
(Levers can be programmed for Single Engine, Twin Engine, and Multiple Engine planes)
(Knobs interchangeable)

Buttons 1 through 12 = Toggle Switches Up/Down, typically used for Landing Gear, Flaps, etc.

Buttons 13 through 24 = Detents (seen in the Control Manager), typically used for Reverse Thrust, etc.
